PROFILE INFO

As an undergraduate with a specialized focus in software engineering and a fervent interest in Quality Assurance, I possess a solid foundation in software testing methodologies and a deep-seated passion for ensuring product excellence. I am eager to contribute to QA processes and acquire hands-on experience in a dynamic work environment. Committed to continuous learning and collaborative engagement with industry professionals to deliver top-notch software solutions.

EXPERIENCE

Jan 2020 - Apr 2021
Private Tutor

I provided personalized tutoring in ICT and Mathematics at my home. Responsibilities included creating lesson plans, tracking student progress and preparing students for exams.

EDUCATION

2021- Present
University of Sri Jayewardenepura

Information and Communication Technology
GPA: 3.32

PROJECTS

Web-Based Voting System
- Designed UI, ensured secure authentication, and maintained voting process integrity.

University Attendance System
- system with a user-friendly interface, database integration, and report generation to simplify manual attendance tracking.

Inventory management system
- Created user-friendly interface for data entry, stock tracking, and reporting.

Education App for Kids
- Developed UI with a focus on educational aspects for children.
